EDUCATION

Sanjay Ghodawat University, Kolhapur, Maharashtra

Bachelor of Technology – Artificial Intelligence and Data Science (AIDS)

Expected Graduation: May 2029

Current Year: First Year (2024–25 Academic Session)

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS, REST(OpenAPI), JavaScript React, ReactNative.

Tools & Framework: Git, GitLab, Dockern, Microsoft Azure

Database: MongoDB

AI Tool Frameworks: Fire Base, Bolt, Base44, Canva

AI Expert: Artificial intelligence, Machin Learning, Natural language processing (NLP)

PROFESSIONAL EXPERIENCE

OpenAI Hackathon (Participant) **Jul 2025**

- Contributed to an AI-based solution using OpenAI APIs for real-time data analysis and user interaction.
- Developed low-latency, high-performance SaaS applications, reducing API response time by 30%, Deployed it using AWS cloud services.
- Strengthened understanding of prompt engineering, AI workflow design, and chatbot application development.

IIT Ropar Hackathon (Participant)

Aug 2025

- Participated in IIT Ropar Hackathon focusing on technology-driven social innovation.
- Proposed enhancements to the **SafeMiles** project by integrating IoT-based accident alert systems and GPS-enabled tracking.

Smart India Hackathon 2025 (Participant) **Sept 2025**

Collaborated with a multidisciplinary team to develop and present the project at the national-level hackathon.

- Participated in the Smart India Hackathon with the project **SafeMiles**, an AI-driven road safety and driver assistance solution designed to reduce accidents and enhance driver awareness.
- Contributed to idea design, problem analysis, and prototype development; shared real-life driving experiences to refine user-focused solutions.

NASA International Space Apps Challenge 2025– "Will It Rain On My Parade?" **Oct 2025**

Gained experience in **data handling, AI model integration, and scientific problem-solving** with real NASA datasets.

- Developed a **weather prediction and rainfall alert system** using **NASA weather and satellite data** to forecast short-term rain and extreme weather conditions.
- Designed an easy-to-use interface to help citizens plan outdoor activities safely by predicting localized rainfall using AI and cloud-based data analysis.

Personal Projects

SafeMiles – AI-Powered Road Safety Assistant **Jan 2025 – Present**

- Designed a driver assistance system integrating AI-based object detection and alert mechanisms to prevent road accidents.
- Utilized Python, OpenCV, and TensorFlow for real-time monitoring and alert notifications.

Farmer Helping Project – Smart Agriculture Platform **Mar 2025 – Present**

- Developed a digital support platform aimed at improving farming efficiency using data-driven insights.
- Focused on providing crop suggestions, weather alerts, and soil health monitoring tools using IoT and AI concepts.

ACADEMIC PROJECTS

SafeMiles – AI-Powered Road Safety System **Jan 2025 – Present**

- Developed a driver safety assistance system using **AI and OpenCV** to detect driver drowsiness, speeding, and obstacles in real-time.
- Integrated **voice alert** and **camera-based monitoring** to prevent accidents and enhance driver awareness.
- Designed a prototype interface displaying live alerts, speed tracking, and fatigue detection results.
- Collaborated with a 5-member team to implement modular components for data collection, processing, and alert generation.
- Improved response accuracy by 30% through iterative testing on real-world driving data and feedback refinement.

Farmer Helping Project – Smart Agriculture Support Platform **Oct 2025 – Present**

- Built a **machine-learning-powered web app** that predicts rainfall and gives crop recommendations using **NASA weather and soil data**.
- Integrated **OpenWeather API** for real-time updates and localized agricultural weather predictions.
- Designed a user dashboard displaying rainfall probability, temperature trends, and soil condition analytics.
- Implemented **AI-based decision support** for irrigation timing, helping reduce water waste and crop damage.
- Aimed to empower farmers with accessible, data-driven insights, improving yield and sustainability by 20%.

Rain Alert Predictor – "Will It Rain On My Parade?" **Oct 2025**

- Built a **machine-learning-powered web app** that predicts rainfall and gives crop recommendations using **NASA weather and soil data**.
- Integrated **OpenWeather API** for real-time updates and localized agricultural weather predictions.
- Designed a user dashboard displaying rainfall probability, temperature trends, and soil condition analytics.
- Implemented **AI-based decision support** for irrigation timing, helping reduce water waste and crop damage.
- Aimed to empower farmers with accessible, data-driven insights, improving yield and sustainability by 20%.

ACHIVEMENTS

Galactic Problem Solver – NASA International Space Apps Challenge 2025

- Recognized for outstanding participation and innovation in solving Earth & Space-related challenges under the theme ***"Will It Rain On My Parade?"*** using NASA's Earth data.

Smart India Hackathon 2025 – National Level Participant

- Presented the project ***SafeMiles*****,** an AI-powered road safety solution, at the hackathon organized by the Ministry of Education's Innovation Cell and Sanjay Ghodawat University.

OpenAI Academy – Generative AI Mastery Workshop (NxtWave, 2025)

- Completed India's Biggest ***GenAI Buildathon***, gaining hands-on experience in AI model creation, chatbot building, and prompt engineering.

GrowifyAI Workshop 2.0 – AI Agents & Automation (2025)

- Built and deployed AI agents for task automation during the national workshop organized by **GrowifyAI** Solutions under the *Startup India* initiative.

Project Showcase – "Kisan Madat" Smart Agriculture Platform

- Developed a web-based system offering **crop-specific medicine** suggestions and rainfall forecasts to support Indian farmers through data-driven decision-making.

PROFESSIONAL CERTIFICATIONS

- NASA International Space Apps Challenge 2025 – Galactic Problem Solver
- Smart India Hackathon 2025 – National Level Participant (Ministry of Education, Govt. of India)
- OpenAI Academy – Generative AI Mastery Workshop (NxtWave, 2025)
- GenAI Buildathon 2025 – NxtWave OpenAI Community
- GrowifyAI Workshop 2.0 – Building AI Agents (DPIIT, Startup India)
